sence also in digital channels offers its customers the entire

mix of products and services related to clothing and home.

has almost 300 stores distributed in 16 states of the northern country, presents annual income 4MM USD, with pre-

2. About the client

3. RHISCOM ATN Company specialized in the automation of testing proces-

ses for retail applications, POS, SCO, Mobile, Web, Kiosk,

with +50 customers and presence in 12 countries.

4. Problem: Test Case Coverage

The customer chose to use UFT as a case automation tool for its regression tests, this generated as a problem the restriction in the coverage of cases to be automated since it does not provide support to be able to record and run test

of Sale (POS) Having to resort to the old modality of manual testing with human resources from the QA team. The consequence is the high cost in time and money that it represents to destine these specialized resources to perform this type of tests.

cases that use any of the physical devices used by its Point

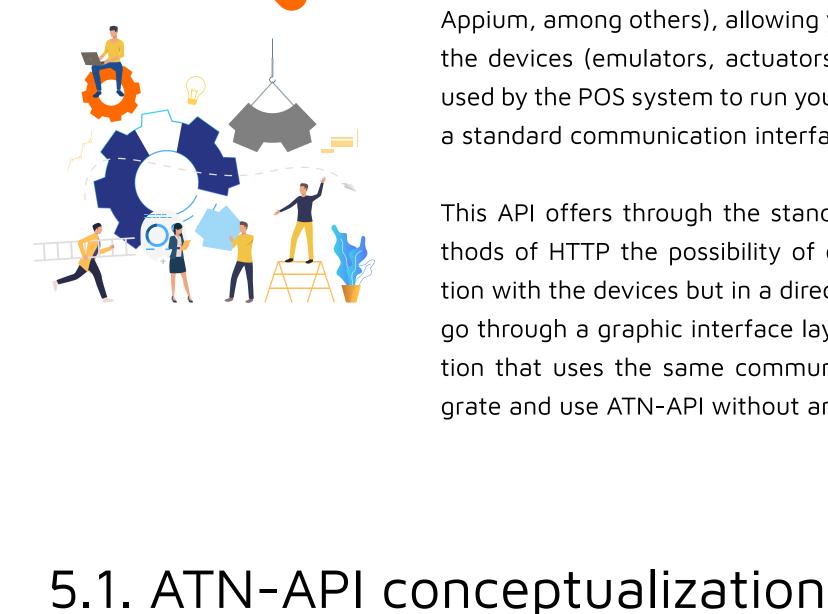

ment for this purpose. 5. Rhiscom ATN Solution ATaaS offers the ATN-API service, which works transversa

Ily to the customers' automation tools (UFT, Selenium,

Appium, among others), allowing you to communicate with

the devices (emulators, actuators and capturers) that are

7. Our vision: To reduce time, costs and optimize the execution of your

regression tests. Now companies that use POS systems can select the automation platform that best suits their needs, with the peace of mind of being able to integrate it into this new ATaaS service that provides maximum automation coverage without the need for a human resource to complement the tests and without the need to have their production POS equipment available for this purpose. reducing time, costs

and optimizing the execution of their regression tests.
